RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 202 pages. Original publisher: Seattle, Wash.: U. S. Dept. of Commerce, National Oceanic and Atmospheric Administration, National Marine Fisheries Service, 2003 OCLC Number: (OCoLC)587658333 Subject: Fish stock assessment -- Pacific Coast (U.S.) -- Congresses. Excerpt: . . . 13 Table 1. Factors identified by other authorities to be considered in assessing the extinction risk of salmon populations. Continued. Factors 8. (Busby et al. 1994) Risk factors evaluated are population trends, reductions in available habitat (dams, logging, mining), hatchery swamping or replacement. ESU was identified but no listing. 9. (National Research Council NRC 1995) Sources of risk are habitat loss, effects of introduced species, and overharvesting. Low population numbers puts populations at risk. Risk factors identified are random changes in demographics (age structure, sex composition, vital statistics) and environmental fluctuations, catastrophes (natural disaster), accumulation of deleterious genetic factors on reduction of low population size, loss of adaptive variation within the population, habitat fragmentation, supplementation (by which is meant hatchery swamping, not support of natural populations by artificial means). 10. (Waples 1995) Risk...

Reviews

The book is fantastic and great. It is loaded with knowledge and wisdom You are going to like the way the article writer create this ebook.

-- Amaya King

This ebook is wonderful. It typically does not expense too much. You wont really feel monotony at at any time of your own time (that's what catalogs are for relating to should you request me).
