The Standard Text-Books on Geography Maury's New Elementary Geography. Maury's Revised Manual of Geography. Maury's New Physical Geography. These books were not compiled from encyclopedias, but are the live work of America's greatest scientist, Matthew F. Maury, LL. D., a distinguished officer in the Navy; first Superintendent of the United States Observatory; discoverer of the North Atlantic Plateau; and author of the Physical Geography of the Sea. The books are watchfully kept in harmony with all geographical changes. The Latest Text-Books on Arithmetic Venable's New Elementary Arithmetic. Venable's New Practical Arithmetic. These books, only recently published, embody all that is best in modern methods. Their characteristic is their teaching power. An able educator writes of them: The singular teaching power of the examples as displayed in the skillful grading of each group not only into oral and written, but in the groups within the groups, each subordinate group serving as a sort of drill table for clearing and fixing some phase of the thinking and work, it is just in this all important point, skillful teaching by examples, that the books seem to me to excel.
