Createspace, United States, 2014. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.As the 21st century begins to bloom, advances in scientific understanding of the human body are leading to tremendous opportunities for treating even the most devastating diseases. Among the most exciting frontiers in medicine is the repair of traumatic injuries to the central nervous system (CNS), including the spinal cord. Improvements in treatment are helping many more people survive spinal cord injury, and the time survivors must spend in the hospital is half what it was 20 years ago. Yet most spinal cord injuries still cause lifelong disability, and further research is critically needed. The injury of actor Christopher Reeve in 1995 drew the world's attention to the tragedy of spinal cord injury. The incidence of spinal cord injuries peaks among people in their early 20s, with a small increase in the elderly population due to falls and degenerative diseases of the spine. Because spinal cord injuries usually occur in early adulthood, those affected often require costly supportive care for many decades. Spinal cord injuries and its aftereffect create enormous burden to the families who become victims of the aftereffects of these disastrous injuries. The consequences are social, economical, and psychological besides medical and surgical complications. Attempt has been made to portray the larger picture of these injuries and its various ramifications. It is primarily intended for the medical students and general practitioners in understanding of these complex injuries. Research in spinal cord regeneration is catching attention of clinicians and basic scientists. It would almost revolutionise the life and disease outcome of these unfortunate patients if we can work out a cost effective and practical treatment regimen for these victims who are unfortunately in the prime of...
