Freedom Publishing Company (IL), United States, 2011. Paperback. Book Condition: New. 226 x 150 mm. Language: English . Brand New Book. Extraordinary Healing documents the extraordinary story of French researcher Mirko Beljanski, known as the father of environmental medicine. Beljanski s discovery of destabilized DNA and the specific plant molecules that can help restore DNA to a healthy state and stop pathological cells from replicating have led to many miraculous cures and prolonged survival for thousands of cancer patients, including French President Francois Mitterand. Previously well-known only in France (where citizens picketed in the streets to be able to use the same protocols which extended the life of President Mitterand), Beljanski s protocols are now gaining popularity in the U.S. and are being used by scientists at Columbia University. L. Stephen Coles, M.D., Ph.D., an expert on supercentenarians-people who live beyond the age of 110-gives an insightful account of the revolutionary approach to prevention and support pioneered by Beljanski, who spent thirty years at the prestigious Pasteur Institute in Paris. A compelling tale of a courageous and brilliant researcher, Extraordinary Healing illuminates the promise of specific, natural plant molecules in the restoration and protection of cellular health. It is a must-read for anyone in the field of cancer research.
