MODERN CONSTRUCTION ECONOMICS: THEORY AND APPLICATION (PAPERBACK)

[DOWNLOAD](#)

Taylor Francis Ltd, United Kingdom, 2015. Paperback. Book Condition: New. 234 x 156 mm. Language: English . Brand New Book. Traditional building economics has primarily been concerned with issues around project appraisal and cost management techniques. On the other hand, modern construction economics has a wider focus with stronger links to mainstream economics, reflecting an increased interest in a range of theoretical issues in construction economics, both at the macro and micro level. In Modern Construction Economics: Theory and Application, a variety of approaches are used to present a coherent vision of synthesis between industry economics and project economics. Topics covered include: * developing construction economics as industry economics * competition and barriers to entry in construction * innovation in construction * theory testing in construction management research * collusion and corruption in the construction sector. Including contributions from academics in the UK, Sweden, Hong Kong, and Australia, this is a truly global review of a core issue for the construction industry worldwide. The result is a unique book that will push toward the development of a comprehensive theoretical framework of construction economics. This is a must-read for all serious students of construction economics, and all practitioners looking for a deeper understanding of their industry.
