

The Messenger of Mathematics Volume . 14 (Paperback)

Filesize: 7.65 MB

Reviews

I actually started out reading this book. It can be packed with wisdom and knowledge I discovered this ebook from my dad and i suggested this book to understand.

(Prof. Barney Harris)

THE MESSENGER OF MATHEMATICS VOLUME . 14 (PAPERBACK)

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1885 Excerpt: .motion of a. fluid element chosen so as to be kinetically symmetrical at time t with respect to its centre of inertia P . The boundary of this element will not in general be spherical, so that the fluid pressures on it will no longer have zero moment about any axis through P . It may, however be easily shewn that the moment is of the third order in the linear dimensions of the element, whilst the remaining quantities with which we have to deal are of the second. If 12 be the pressure, p the density, the moment of the pressures about:2: will be if l, m, n be the direction-cosines of the normal to an element dS of the surface. This is equal to If we expand and $l)$ E by Maclaurin's theorem, and take account of the kinetic symmetry, we obtain, to the second order, $iii\ 6$)- (iitlli if I be the moment of inertia about an axis through P . This vanishes when p is a function of p . fience, if as before we take as axes of reference a system passing through P , coincident at time t with the principal axes of the distortion, and moving about their instantaneous positions with the angular velocity of the fluid, the equations (4) will still hold at time t . At time $t+dt$ the element considered will no longer be kinetically symmetrical with respect to P , but its principal axes of inertia will be coincident with the...
